

## ABSTRACT OF THE INVENTION

A flashing wheel cover comprises a cover having a plurality of via holes; a box body at an inner surface of the cover; the box body being formed with a seat, a permeation-proof washer, and a cover body; the seat and cover body being transparent; a wall of the seat having a plurality of convex cambered surfaces; the permeation-proof washer being installed between the seat and the cover body; a circuit board being installed in the box body; the circuit board being installed with a plurality of LEDs, a light controlled IC, and a plurality of batteries, a vibration switch and an LED IC. The flashing way of the LEDs is controlled by the LED IC so as to present various flashing way. The wheel speed increases, an apparent flash circle is presented so as to present a beautiful effect and alert other peoples to take attention to the cars.
